Technological diversification of Indian firms: A study based on Indian Patent data

Madan Dhanora and Shadab Danish will present key findings of their paper 'Technological diversification of Indian firms: A study based on Indian Patent data'. The paper discusses the technological diversification (TD) of innovative Indian firms. Utilizing firm level patent data for high, medium and low technology firms in India for the time period 2000-2016, the study proposes to estimate the TD of all innovative firms in India and capture its depth and spread.

DATE
March 17th

TIME
6.00-7.00 p.m.
