Malhar Nabar

Global Economic Prospects and Policies

Malhar Nabar heads the World Economic Studies division in the IMF's Research Department, which produces the World Economic Outlook (WEO). He will talk about 'Global Economic Prospects and Policies'.

Economic recoveries are diverging across countries and sectors, reflecting variation in pandemic-induced disruptions and the extent of policy support. The outlook depends not just on the outcome of the battle between the virus and vaccines —it also hinges on how effectively economic policies deployed under high uncertainty can limit lasting damage from this unprecedented crisis.
