SEMINAR SERIES

November 2025

DATE

November 19th, 2025

TIME

5.00-6.00 p.m.

Dr. Shanul Gawshinde

Symbiosis Institute of
Management Studies, Pune

Deciphering the Link Between Financial Inclusion and Economic Growth: A Nexus Analysis

Abstract: A country's exemplary financial structure provides an unquestionable foundation for sustainable development and economic progress. It makes banking services available to citizens at any level of the economy at convenient rates. The meaning of inclusive finance was further expanded to encompass other services financed, especially the fiduciary guardianship for savings and an extensive range of loan products for small businesses, as well as other financial mechanisms that reduce financing risk through a partition of investments and insurance mediation (Wang et al.2022). Inclusive finance calls for a solemn catalyst of all individuals' well-being and demystification by pulling down the bridge and teeming injustice. The world is a vastly different place today than it was a quarter of a century ago. A combination of civil unrest and technological evolution has reset the stage that people all over the globe have been living on. For some, this is tremendously positive news as for others this represents another step backwards for the progress made in the second half of the 20th century.
